BOARD OF ZONING ADJUSTMENT

SEPTEMBER 2007

The applicant is requesting Use, Parking/Maneuvering, Landscaping and Tree Planting Variances to allow a convenience store on the ground floor with a studio apartment (single-family dwelling) on the second floor in an R-1, Single-Family Residential District, with undesignated parking and maneuvering areas, no landscaping provided and no trees on site; the Zoning Ordinance requires B-2, Neighborhood Business District, for a convenience store on the ground floor with a single-family dwelling on the second floor, striped parking stalls, 24' wide maneuvering area, 12 percent landscaping, and 22 total trees (15 over story and 7 under story) are required.

The subject property has been used in the past as a convenience store, but the last business license activity was in December 2002, and the right for it to be used in a legal nonconforming status has expired. The applicant states that the purpose of the business would be to provide needed staples to customers in the area that do not have reliable transportation and is next to low income housing apartments. It is further stated that the location is not suitable to be a residence because of the existing commercial configuration. The proposed business operating hours would be from 7 AM to 7 PM.

With regard to the use variance request, the site consists of approximately 1/3 acre and would be considered too small for rezoning, but obviously has been developed as a commercial site. The proposed use of a single-family dwelling above the convenience store is now allowed under the Zoning Ordinance as amended in November 2005. The convenience store use would be consistent with the previous use, and would also be consistent with neighboring legal nonconforming B-2 uses at the Southwest corner of Prichard Avenue West and Summerville Street.

With regard to the parking/maneuvering variance request, it is proposed that the site would again be used as in the past with unstriped parking and substandard maneuvering area. Whereas the site was apparently developed commercially prior to the current parking/maneuvering standards, there is adequate undeveloped open area on the site where compliant parking and maneuvering could be provided. In variance cases where there is no hardship imposed by the property impacting the possibility of site improvements to comply with the Ordinance, the site improvements are preferred. In this instance, no hardship is illustrated; therefore modification of the parking/maneuvering area and closing of the continuous curb cut along Prichard Avenue West, along with the installation of a curb cut approved by Traffic Engineering, would be desired.

With regard to the landscaping and tree planting variance requests, it follows that if no hardship is illustrated which would prevent the installation of required landscaping and tree plantings, those, too, are preferred. In this instance, no hardship has been illustrated, and with site modifications along Prichard Lane West, sufficient room would exist for required frontage landscaping and tree planting. Sufficient open area remains along the South and East property lines for the balance of the tree planting requirements.

The Zoning Ordinance states that no variance shall be granted where economics are the basis for the application. Furthermore, the applicant must present sufficient evidence to find that the variance will not be contrary to the public interest, and that special conditions exist such that a literal enforcement of the Ordinance will result in an unnecessary hardship. The Ordinance also states that a variance should not be approved unless the spirit and intent of the Ordinance is observed and substantial justice done to the applicant and the surrounding neighborhood.

Variances are not intended to be granted frequently. The applicant must clearly show the Board that the request is due to very unusual characteristics of the property and that it satisfies the variance standards. What constitutes unnecessary hardship and substantial justice is a matter to be determined from the facts and circumstances of each application.

In instances where commercial legal nonconforming statuses have expired and reuse is sought, policy is to obtain as much site compliance as possible beyond any illustrated hardship. In this instance, the site has adequate area to provide compliant parking/maneuvering, landscaping, and tree planting, and the site plan should be revised to indicate as much site compliance as possible. The Board should consider holding this application over to the October meeting to allow the applicant to submit a revised site plan addressing these issues.

RECOMMENDATION 5427**Date: September 10, 2007**

Based on the preceding, this application is recommended for holdover to the October meeting to allow the applicant to submit a revised site plan indicating parking/maneuvering, landscaping and tree planting compliance.
