BOARD OF ADJUSTMENT
VICINITY MAP - EXISTING AERIAL

The site is surrounded by commercial units.

APPLICATION NUMBER	6569	DATE	January 8, 2024	 NTS
APPLICANT	WheelCare, LLC			
REQUEST	Special Exception			

SITE HISTORY

The subject site was assigned an R-A, Residential-Agricultural zoning classification with the adoption of the Zoning Ordinance in 1967. In May, 1968, it was rezoned to B-3, Community Business District.

The site has been before the Board of Zoning Adjustment five (5) times in the past. On March 3, 1986, a variance request for reduced side yard setbacks was approved to accommodate drive up tellers. On June 2, 1997, a variance request was approved to allow a new 20-foot tall freestanding sign in addition to the existing one. On March 2, 1998, a variance request was approved to allow another new 20-foot tall freestanding sign in addition to the existing ones. On May 4, 1998, the March 1998 approval was amended to allow the third freestanding sign on the site to have a height of 29-feet, 11-inches. Most recently, the site had a variance approved on June 2, 2014 to allow a reduced side street side yard setback.

The site was originally a portion of Lot 3, College Park Northeastern Quadrangle Subdivision, a seven (7)-lot subdivision approved by the Planning Commission in July, 1971.

In January, 1978, the site acquired its current configuration as Lot 1, Dauphin – 65 Subdivision, a three (3)-lot subdivision approved by the Planning Commission.

STAFF COMMENTS

Engineering Comments:

No comments.

Traffic Engineering Comments:

No traffic impacts anticipated by this variance request.

Urban Forestry Comments:

Property to be developed in compliance with state and local laws that pertain to tree preservation and protection on both city and private properties [Act 929 of the 1961 Regular Session of the Alabama Legislature (Acts 1961, p. 1487), as amended, and City Code Chapters 57 and 65]. Private removal of trees in the right-of-way will require approval of the Mobile Tree Commission. Removal of heritage trees from undeveloped residential sites, developed residential sites in historic districts, and all commercial sites will require a tree removal permit.

Fire Department Comments:

All projects within the City Limits of Mobile shall comply with the requirements of the City of Mobile Fire Code Ordinance (2021 International Fire Code). Fire apparatus access is required to be within 150' of all non-sprinklered commercial buildings and within 300' of all sprinklered commercial buildings. Fire water supply for all commercial buildings will be required to meet the guidance of Appendices B and C of the 2021 International Fire Code. The minimum requirement for fire hydrants is to be within 400' of non-sprinkled commercial buildings, within 600' of sprinkled commercial buildings, and within 100' of fire department connections (FDC) for both standpipes and sprinkler systems.

Planning Comments:

The applicant has requested a Special Exception to allow Ground Passenger Transportation to operate in a B-3, Community Business Suburban District; the Unified Development Code (UDC) requires a Special Exception to allow Ground Passenger Transportation to operate in a B-3, Community Business Suburban District. The complete application is available via the link on page 1.

The subject site is developed as an office park complex. No expansion of existing facilities on the site is proposed. The proposed use as an administrative office for patient medical appointment transportation would be in keeping with the existing uses within the complex.

The site plan submitted indicates the three (3) existing buildings on the site occupying approximately 55,267 square feet. As the current uses on the site are offices and clinics, the required on-site parking ratio is one (1) space per 400 square feet of gross floor area, or 139 parking spaces required. The site plan indicates at least 300 on-site parking spaces provided. Therefore, the site should be able to handle the three (3) proposed company automobile-sized vehicles proposed to be parked on-site. Furthermore, it does not appear that the proposed use would have any negative impact upon the site or surrounding area.

SPECIAL EXCEPTION CONSIDERATIONS

Standards of Review:

Special Exceptions are those uses that may have some special impact which differs from the potential impacts of permitted uses, exceeds permitted uses in intensity, or have a uniqueness such that their effect on the surrounding environment cannot readily be determined in advance of the use being proposed in a particular location.

Article 5 Section 11-E.1. of the Unified Development Codes states the Board of Adjustment will not approve an Application for Special Exception unless the request complies with the following criteria:

- (a)** The proposed use is in harmony with the general purpose, goals, objectives and standards of this Chapter, or any other plan, program, map, or ordinance adopted, or under consideration pursuant to official notice, by the City.
- (b)** The proposed use at the proposed location shall not result in a substantial or undue adverse effect on adjacent property, the character of the neighborhood, traffic conditions, parking, public improvements, public sites or rights-of-way, or other matters affecting the public health, safety and general welfare either as they now exist or as they may in the future be developed as a result of the implementation of provisions and policies of this Chapter, or any other plan, program, map, or ordinance adopted, or under consideration pursuant to official notice, by the City or other governmental agency having jurisdiction to guide growth and development.
- (c)** The proposed use will be adequately served by, and will not impose an undue burden on, any of the improvements, facilities, utilities, and services specified in this subsection. Where any such improvements, facilities, utilities or services are not available or adequate to service the proposed use in the proposed location, the Applicant shall, as part of the application and as a condition to approval of the proposed Special Exception permit, be responsible for establishing ability, willingness and commitment to provide such improvements, facilities, utilities and services in sufficient time and in a manner consistent with this Chapter, and other plans, programs, maps and ordinances adopted by the City to guide its growth and development. The approval of the

Special Exception Permit shall be conditioned upon such improvements, facilities, utilities and services being provided and guaranteed by the Applicant.

- (d) The proposed use is consistent with all applicable requirements of this Chapter, including:
 - (1) Any applicable development standards in Article 3; and
 - (2) Any applicable use regulations in Article 4.
- (e) The proposed use is compatible with the character of the neighborhood within the same zoning district in which it is located;
- (f) The proposed use will not impede the orderly development and improvement of surrounding property for uses permitted within the zoning district; and
- (g) The proposed use will have no more adverse effects on health, safety or comfort of persons living or working in the neighborhood, or will be no more injurious to property or improvements in the neighborhood than would any other use generally permitted in the same district.
 - (1) In making this determination, the Board of Adjustment shall consider:
 - a. The location, type and height of buildings or structures;
 - b. The type and extent of landscaping and screening;
 - c. Lighting;
 - d. Hours of operation; or
 - e. Other conditions that might require mitigation of any adverse impacts of the proposed development.
- (h) The site is designed to provide ingress and egress that minimize traffic hazards and traffic congestion on the public roads.
- (i) The site is designed to minimize the impact on storm water facilities.
- (j) The use will be adequately served by water and sanitary sewer services.
- (k) The use is not noxious or offensive by reason of emissions, vibration, noise, odor, dust, smoke or gas; and
- (l) The use will not be detrimental or endanger the public health, safety or general welfare.

Article 5 Section 11-E.2. states; that when considering a Special Exception application, the City's and the larger community's best interests and the need, benefit, or public purpose of the proposed request should also be evaluated.

Additionally, Article 5, Section 11-E.3. states:

The Board of Adjustment shall give careful consideration to the warrants and criteria set forth in this section in judging applications for Special Exceptions involving the following uses. In granting a Special Exception, the board may attach such reasonable conditions and safeguards in addition to those set forth in this section, as it may deem necessary to implement the purposes of this Chapter.

Considerations:

Based on the requested Special Exception application, if the Board considers approval of the request, the following findings of fact must be present:

- 1) The proposed use is in harmony with the general purpose, goals, objectives and standards of this Chapter, or any other plan, program, map, or ordinance adopted, or under consideration pursuant to official notice, by the City.

- 2) The proposed use at the proposed location **shall not** result in a substantial or undue adverse effect on adjacent property, the character of the neighborhood, traffic conditions, parking, public improvements, public sites or rights-of-way, or other matters affecting the public health, safety and general welfare either as they now exist or as they may in the future be developed as a result of the implementation of provisions and policies of this Chapter, or any other plan, program, map, or ordinance adopted, or under consideration pursuant to official notice, by the City or other governmental agency having jurisdiction to guide growth and development.
- 3) The proposed use **will** be adequately served by, and will not impose an undue burden on, any of the improvements, facilities, utilities, and services specified in this subsection.
- 4) The proposed use **is** consistent with all applicable requirements of this Chapter, including: any applicable development standards in Article 3; and any applicable use regulations in Article 4.
- 5) The proposed use **is** compatible with the character of the neighborhood within the same zoning district in which it is located.
- 6) The proposed use **will not** impede the orderly development and improvement of surrounding property for uses permitted within the zoning district.
- 7) The proposed use **will** have no more adverse effects on health, safety or comfort of persons living or working in the neighborhood, or will be no more injurious to property or improvements in the neighborhood than would any other use generally permitted in the same district.
- 8) The site **is** designed to provide ingress and egress that minimize traffic hazards and traffic congestion on the public roads.
- 9) The site **is** designed to minimize the impact on storm water facilities.
- 10) The use **will** be adequately served by water and sanitary sewer services.
- 11) The use **is not** noxious or offensive by reason of emissions, vibration, noise, odor, dust, smoke or gas; and
- 12) The use **will not** be detrimental or endanger the public health, safety or general welfare.

If the Board is inclined to approve the Special Exception, it should be subject to the following condition:

- 1) Full compliance with all municipal codes and ordinances.

Zoning District Correspondence Matrix

- Directly Related
- Elements of the zoning category are related to the future LU category, but with qualifications (such as a development plan with conditions)
- Land use category is appropriate, but the district does not directly implement the category (e.g., open space in an industrial district)

MIXED COMMERCIAL CORRIDOR (MCC)

This land use designation mostly applies to transportation corridors west of I-65 serving primarily the low-density (suburban) residential neighborhoods. MCC includes a wide variety of retail, services and entertainment uses.

This designation acknowledges existing commercial development that is spread along Mobile's transportation corridors in a conventional strip pattern or concentrated into shorter segments of a corridor.

Over time, new development and redevelopment in Mixed Commercial Corridors is encouraged to raise design quality, improve connectivity to surrounding neighborhoods; improved streetscapes; and improve mobility and accessibility for all users of the corridor.
