BOARD OF ADJUSTMENT VICINITY MAP - EXISTING AERIAL

The site is surrounded by business and residential areas.

APPLICATION NUMBER	<u>6539</u>	DATE	<u>September 11, 2023</u>
APPLICANT	<u>Adrian R. Gonzalez</u>		
REQUEST	<u>Special Exception</u>		

SITE HISTORY

In 2005, the Harkness Subdivision was approved as a two-lot Subdivision, which was recorded in Probate Court.

The site has been the subject of several Planned Unit Development applications before the Planning Commission to allow multiple structures on a single building site, and shared access between 1601 East I-65 Service Road South and 1607 East I-65 Service Road South. The most recent application was in April 2015, to allow an additional structure to be built at the rear of the existing structure at 1607 East I-65 Service Road South, which has shared access with the subject site. While approved, that additional was never built, thus that approval has expired.

The site was previously occupied by Blue Rents, which had heavy equipment leasing, however they were advised by staff multiple times that a Planning Approval was needed in order to allow that use in a B-3 district; Blue Rents never obtained the required Planning Approval.

In 2005 and 2009, variances were granted for the site to allow gravel parking and access/maneuvering areas. It should be noted that the 2009 approval specified that the approval was valid for two (2) years.

STAFF COMMENTS

Engineering Comments:

No comments.

Traffic Engineering Comments:

No comments.

Urban Forestry Comments:

Property to be developed in compliance with state and local laws that pertain to tree preservation and protection on both city and private properties [Act 929 of the 1961 Regular Session of the Alabama Legislature (Acts 1961, p. 1487), as amended, and City Code Chapters 57 and 65]. Private removal of trees in the right-of-way will require approval of the Mobile Tree Commission. Removal of heritage trees from undeveloped residential sites, developed residential sites in historic districts, and all commercial sites will require a tree removal permit.

Fire Department Comments:

All projects within the City Limits of Mobile shall comply with the requirements of the City of Mobile Fire Code Ordinance (2021 International Fire Code). Fire apparatus access is required to be within 150' of all commercial and residential buildings. A fire hydrant is required to be within 400' of non-sprinkled commercial buildings and 600' of sprinkled commercial buildings.

Planning Comments:

The applicant has requested a Special Exception to allow heavy equipment sales in a B-3, Community Business Suburban District; the Unified Development Code (UDC) requires a Special Exception to allow heavy equipment sales in a B-3, Community Business Suburban District. The applicant states their hours of operation will be Monday thru Friday, 7 AM – 5 PM, and Saturday, 8 AM – 1 PM. The complete application is available via the link on page 1.

The subject site is developed currently with an existing structure with a showroom and warehouse, and no new structures are proposed. The front portion of the lots have paved parking, but the remainder of the site appears to be surfaced in gravel. It should be noted that the Unified Development Code (UDC) requires the minimum amount of required parking to be surfaced with asphalt or concrete, and parking in excess of the minimum amount required have an alternative parking surface, such as gravel. Furthermore, the UDC allows vehicle inventory and storage areas to be surfaced with aggregate.

As illustrated on page 10, a portion of the subject site abuts residentially zoned property. If approved, the site plan should be revised to depict a compliant residential buffer, where appropriate.

SPECIAL EXCEPTION CONSIDERATIONS

Standards of Review:

Special Exceptions are those uses that may have some special impact which differs from the potential impacts of permitted uses, exceeds permitted uses in intensity, or have a uniqueness such that their effect on the surrounding environment cannot readily be determined in advance of the use being proposed in a particular location.

Article 5 Section 11-E.1. of the Unified Development Codes states the Board of Adjustment will not approve an Application for Special Exception unless the request complies with the following criteria:

- (a)** The proposed use is in harmony with the general purpose, goals, objectives and standards of this Chapter, or any other plan, program, map, or ordinance adopted, or under consideration pursuant to official notice, by the City.
- (b)** The proposed use at the proposed location shall not result in a substantial or undue adverse effect on adjacent property, the character of the neighborhood, traffic conditions, parking, public improvements, public sites or rights-of-way, or other matters affecting the public health, safety and general welfare either as they now exist or as they may in the future be developed as a result of the implementation of provisions and policies of this Chapter, or any other plan, program, map, or ordinance adopted, or under consideration pursuant to official notice, by the City or other governmental agency having jurisdiction to guide growth and development.
- (c)** The proposed use will be adequately served by, and will not impose an undue burden on, any of the improvements, facilities, utilities, and services specified in this subsection. Where any such improvements, facilities, utilities or services are not available or adequate to service the proposed use in the proposed location, the Applicant shall, as part of the application and as a condition to approval of the proposed Special Exception permit, be responsible for establishing ability, willingness and commitment to provide such improvements, facilities, utilities and services in sufficient time and in a manner consistent with this Chapter, and other plans, programs, maps and ordinances adopted by the City to guide its growth and development. The approval of the Special Exception Permit shall be conditioned upon such improvements, facilities, utilities and services being provided and guaranteed by the Applicant.
- (d)** The proposed use is consistent with all applicable requirements of this Chapter, including:
 - (1)** Any applicable development standards in Article 3; and
 - (2)** Any applicable use regulations in Article 4.

- (e) The proposed use is compatible with the character of the neighborhood within the same zoning district in which it is located;
- (f) The proposed use will not impede the orderly development and improvement of surrounding property for uses permitted within the zoning district; and
- (g) The proposed use will have no more adverse effects on health, safety or comfort of persons living or working in the neighborhood, or will be no more injurious to property or improvements in the neighborhood than would any other use generally permitted in the same district.

(1) In making this determination, the Board of Adjustment shall consider:

- a. The location, type and height of buildings or structures;
 - b. The type and extent of landscaping and screening;
 - c. Lighting;
 - d. Hours of operation; or
 - e. Other conditions that might require mitigation of any adverse impacts of the proposed development.
- (h) The site is designed to provide ingress and egress that minimize traffic hazards and traffic congestion on the public roads;
 - (i) The site is designed to minimize the impact on storm water facilities;
 - (j) The use will be adequately served by water and sanitary sewer services;
 - (k) The use is not noxious or offensive by reason of emissions, vibration, noise, odor, dust, smoke or gas; and
 - (l) The use will not be detrimental or endanger the public health, safety or general welfare.

Article 5 Section 11-E.2. states; that when considering a Special Exception application, the City's and the larger community's best interests and the need, benefit, or public purpose of the proposed request should also be evaluated.

Additionally, Article 5, Section 11-E.3. states:

The Board of Adjustment shall give careful consideration to the warrants and criteria set forth in this section in judging applications for Special Exceptions involving the following uses. In granting a Special Exception, the board may attach such reasonable conditions and safeguards in addition to those set forth in this section, as it may deem necessary to implement the purposes of this Chapter.

Considerations:

Based on the requested Special Exception application, if the Board considers approval of the request, the following findings of fact must be present:

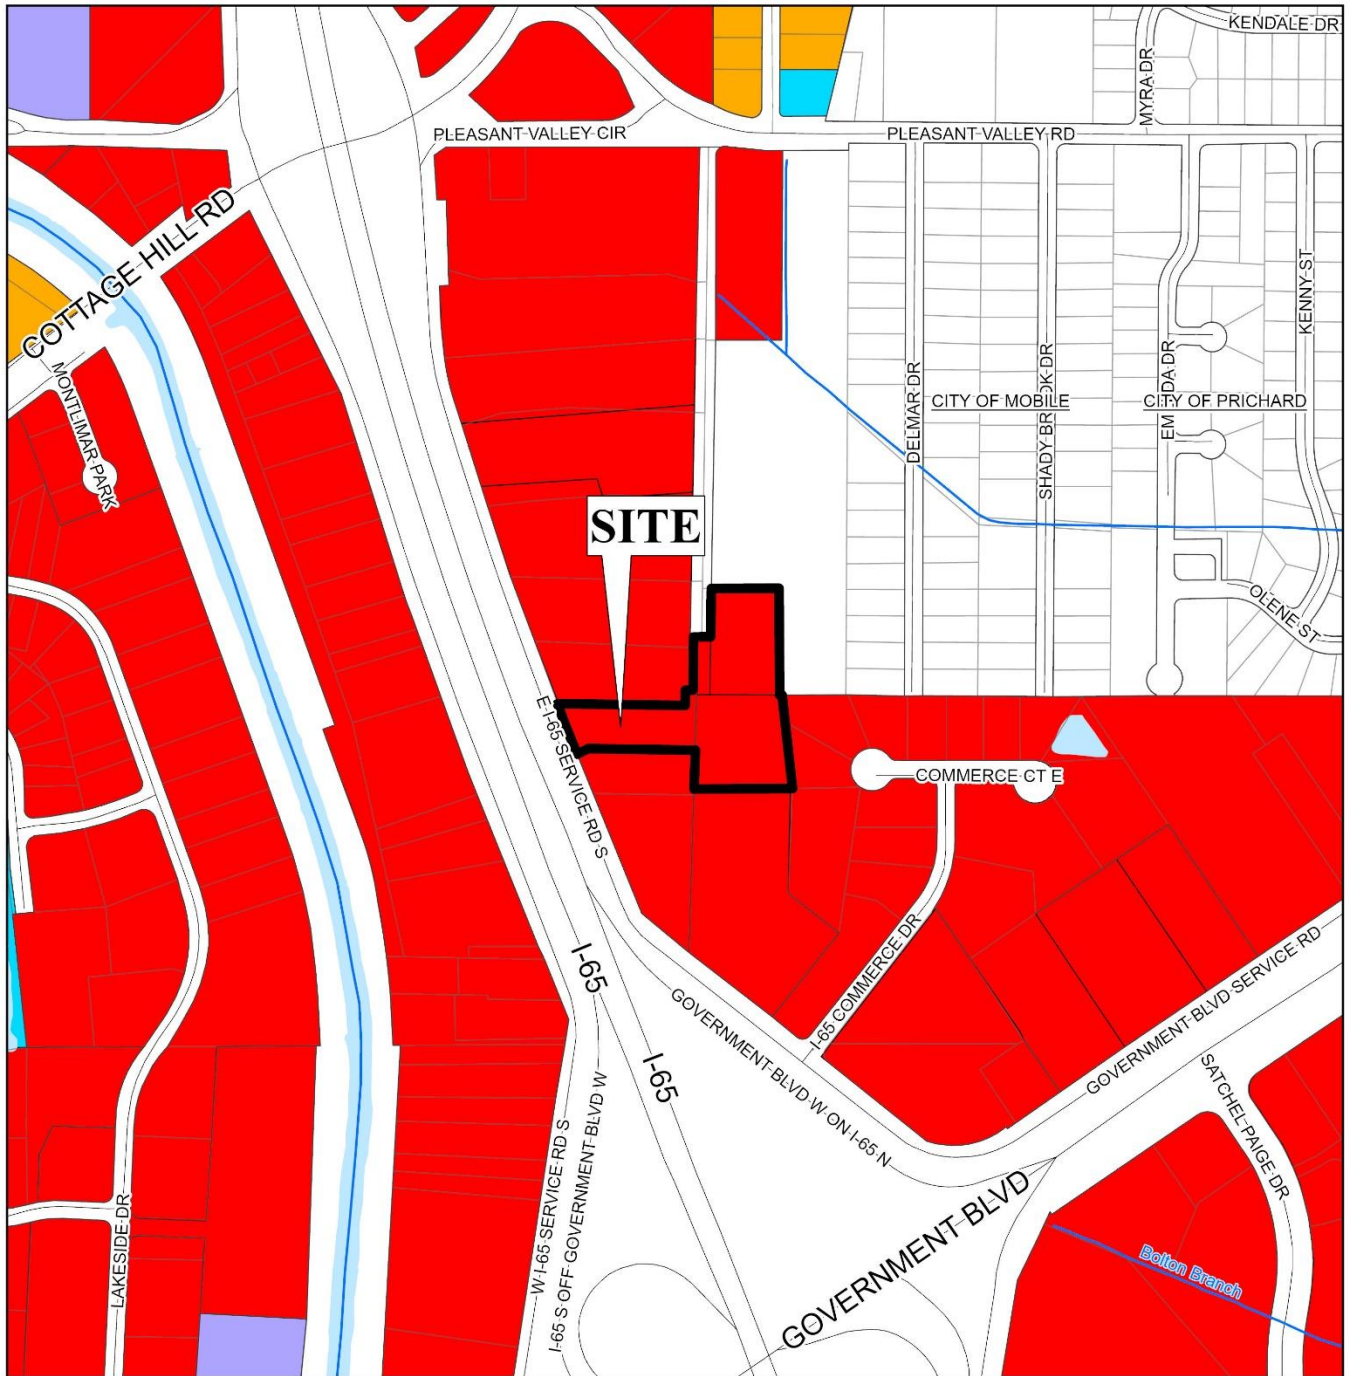

- 1) The proposed use **is** in harmony with the general purpose, goals, objectives and standards of this Chapter, or any other plan, program, map, or ordinance adopted, or under consideration pursuant to official notice, by the City.
- 2) The proposed use at the proposed location **shall not** result in a substantial or undue adverse effect on adjacent property, the character of the neighborhood, traffic conditions, parking, public improvements, public sites or rights-of-way, or other matters affecting the public health, safety and general welfare either as they now exist or as they may in the future be developed as a result of the implementation of provisions and policies of this Chapter, or any other plan, program, map, or ordinance adopted, or under consideration pursuant to official notice, by the City or other governmental agency having jurisdiction to guide growth and development.

- 3) The proposed use **will** be adequately served by, and will not impose an undue burden on, any of the improvements, facilities, utilities, and services specified in this subsection.
- 4) The proposed use **is** consistent with all applicable requirements of this Chapter, including: any applicable development standards in Article 3; and any applicable use regulations in Article 4.
- 5) The proposed use **is** compatible with the character of the neighborhood within the same zoning district in which it is located.
- 6) The proposed use **will not** impede the orderly development and improvement of surrounding property for uses permitted within the zoning district.
- 7) The proposed use **will** have no more adverse effects on health, safety or comfort of persons living or working in the neighborhood, or will be no more injurious to property or improvements in the neighborhood than would any other use generally permitted in the same district.
- 8) The site **is** designed to provide ingress and egress that minimize traffic hazards and traffic congestion on the public roads.
- 9) The site **is** designed to minimize the impact on storm water facilities.
- 10) The use **will** be adequately served by water and sanitary sewer services.
- 11) The use **is not** noxious or offensive by reason of emissions, vibration, noise, odor, dust, smoke or gas; and
- 12) The use **will not** be detrimental or endanger the public health, safety or general welfare.

If the Board is inclined to approve the Special Exception, it should be subject to the following conditions:

- 1) Hours of operation limited to Monday thru Friday, 7 AM – 5 PM, and Saturday, 8 AM – 1 PM as stated in the application; and
- 2) Revision of the site plan to depict a compliant residential buffer, where appropriate.

Zoning District Correspondence Matrix

- Directly Related
- Elements of the zoning category are related to the future LU category, but with qualifications (such as a development plan with conditions)
- Land use category is appropriate, but the district does not directly implement the category (e.g., open space in an industrial district)

MIXED COMMERCIAL CORRIDOR (MCC)

This land use designation mostly applies to transportation corridors west of I-65 serving primarily the low-density (suburban) residential neighborhoods. MCC includes a wide variety of retail, services and entertainment uses.

This designation acknowledges existing commercial development that is spread along Mobile's transportation corridors in a conventional strip pattern or concentrated into shorter segments of a corridor.

Over time, new development and redevelopment in Mixed Commercial Corridors is encouraged to raise design quality, improve connectivity to surrounding neighborhoods; improved streetscapes; and improve mobility and accessibility for all users of the corridor.
