REMARKS

The applicant is seeking Planned Unit Development Approval to amend a previously approved Planned Unit Development to allow the expansion and addition to an existing domiciliary care facility, and Subdivision Approval to re-subdivide two existing lots of record into three lots. The site is located in Council District 6, and according to the applicant is served by public water and sanitary sewer facilities.

The subject site was recently approved in December 2009 for 24 unit expansion and renovation of the existing assisted living facility. The applicant now wishes to subdivide the property on which the facility is located, along with the lot directly to the North (across Somerby Lane).

Planned Unit Development review examines the site with regard to its location to ensure that it is generally compatible with neighboring uses; that adequate access is provided without generating excess traffic along minor residential streets in residential districts outside the PUD; and that natural features of the site are taken into consideration. PUD review also examines the design of the development to provide for adequate circulation within the development; to ensure adequate access for emergency vehicles; and to consider and provide for protection from adverse effects of adjacent properties as well as provide protection of adjacent properties from adverse effects from the PUD.

It is very important to note that Planned Unit Development review is site plan specific; therefore any future changes (parking, structure expansion, etc.) must be resubmitted for Planned Unit Development review, and be approved through the planning process.

It should be noted that the subject site is part of an exiting private street subdivision, with access via the private drive only. To keep with former conditions of approval, a note should be placed on the final subdivision plat stating that all access and curb cutting is limited to the approved Planned Unit Development site plan.

As mentioned, the applicant is simply re-subdividing existing legal lots; there is no change in the proposed development from recently approved application. The lot on which the assisted living facility is located is being split into two lots, while the existing lot to the North (across Somerby Lane) will remain the same (no change in dimensions). As illustrated on the plat, however, the proposed interior lot line (between Lots 1 and 2) will split the existing facility. It should be noted that the site is zoned B-1, Buffer Business and, as such, is limited by 5' side and rear setbacks. With that said, zero lot lines are common in situations where certain uses (i.e. medical facilities) traverse multiple lots; therefore, the commission should have some justification in approving the applicant's request.

The geographic area defined by the city of Mobile and its planning jurisdiction, including this site, may contain Federally-listed threatened or endangered species as well as protected non-

game species. Development of the site must be undertaken in compliance with all local, state and Federal regulations regarding endangered, threatened or otherwise protected species.

RECOMMENDATION
