

MACK'S WAY SUBDIVISION

Engineering Comments: FINAL PLAT COMMENTS (should be addressed prior to submitting the FINAL PLAT for review and/or signature by the City Engineer):

- A. Provide all of the required information on the SUBDIVISION PLAT (i.e. signature blocks, signatures, certification statements, written legal description, required notes, legend, scale, bearings and distances) that is required by the current Alabama State Board of Licensure for Professional Engineers and Land Surveyors.
- B. Provide and label the monument set or found at each subdivision corner.
- C. Provide the Surveyor's, Owner's (notarized), Planning Commission, and Traffic Engineering signatures.
- D. Add a note to the SUBDIVISION PLAT stating that a Land Disturbance permit will be required for any land disturbing activity in accordance with Mobile City Code, Chapter 17, Storm Water Management and Flood Control); the City of Mobile, Alabama Flood Plain Management Plan (1984); and, the Rules For Erosion and Sedimentation Control and Storm Water Runoff Control.
- E. Add a note to the Plat stating that the approval of all applicable federal, state, and local agencies (including all storm water runoff, wetland and floodplain requirements) will be required prior to the issuance of a Land Disturbance permit.
- F. Add a note that sidewalk is required to be constructed, and/or repaired, along the frontage of each lot, or parcel, at time of new development or construction, unless a sidewalk waiver is approved.
- G. Add a note to the plat stating that all proposed detention facilities, common areas, and wetlands shall be the responsibility of the Property Owner(s), and not the responsibility of the City of Mobile.
- H. Add a note to the plat stating that all easements shall remain in effect until vacated through the proper Vacation process.
- I. Provide a copy of the FINAL SUBDIVISION PLAT to the Engineering Dept. for review. No signatures are required on this drawing.
- J. After addressing all of the FINAL SUBDIVISION PLAT review comments by the Engineering Dept. provide the red-line markup, the ORIGINAL (with all other signatures) and one (1) copy of the revised original (signatures not required) of the revised Final Plat to the Engineering Department.

Traffic Engineering Comments: Driveway number, size, location and design to be approved by Traffic Engineering and conform to AASHTO standards.

Urban Forestry Comments: Property to be developed in compliance with state and local laws that pertain to tree preservation and protection on both city and private properties (State Act 2015-116 and City Code Chapters 57 and 64). Private removal of trees in the right-of-way will require approval of the Mobile Tree Commission. Removal of heritage trees from a commercial site will require a tree removal permit.

Fire Department Comments: All projects within the City Limits of Mobile shall comply with the requirements of the City of Mobile Fire Code Ordinance (2012 International Fire Code).

The plat illustrates the proposed 2-lot, 0.5± acre subdivision which is located on the South side of Massengale Drive, 75'± East of Alba Club Road, in Council District 3. The purpose of this application is to create two legal lots from two existing legal lots. The applicant states the site is served by public water and sewer services

The site has been given a Low Density Residential (LDR) land use designation, per the adopted Future Land Use Plan and Map. The Future Land Use Plan and Map complements and provides additional detail to the Development Framework Maps in the Map for Mobile, adopted by the Planning Commission at its November 5, 2015 meeting.

This designation applies to existing residential neighborhoods found mostly west of the Beltline or immediately adjacent to the east side of the Beltline.

The primary land use in the LDR districts is residential and the predominant housing type is the single-family housing unit, detached or semidetached, typically placed within a street grid or a network of meandering suburban streets. The density in these districts ranges between 0 and 6 dwelling units per acre (du/ac).

These neighborhoods may also contain small-scale, low-rise multi-unit structures at appropriate locations, as well as complementary retail, parks and civic institutions such as schools, community centers, neighborhood playgrounds, and churches or other religious uses if those uses are designed and sited in a manner compatible with and connected to the surrounding context. The presence of individual ancillary uses should contribute to the fabric of a complete neighborhood, developed at a walkable, bikeable human scale.

It should be noted that the Future Land Use Plan and Map components of the Map for Mobile Plan are meant to serve as a general guide, not a detailed lot and district plan. In many cases the designation on the new Future Land Use Map may match the existing use of land, but in others the designated land use may differ from what is on the ground today. As such, the Future Land Use Plan and Map allows the Planning Commission and City Council to consider individual cases based on additional information such as the classification request, the surrounding development, the timing of the request, and the appropriateness and compatibility of the proposed use and, where applicable, the zoning classification.

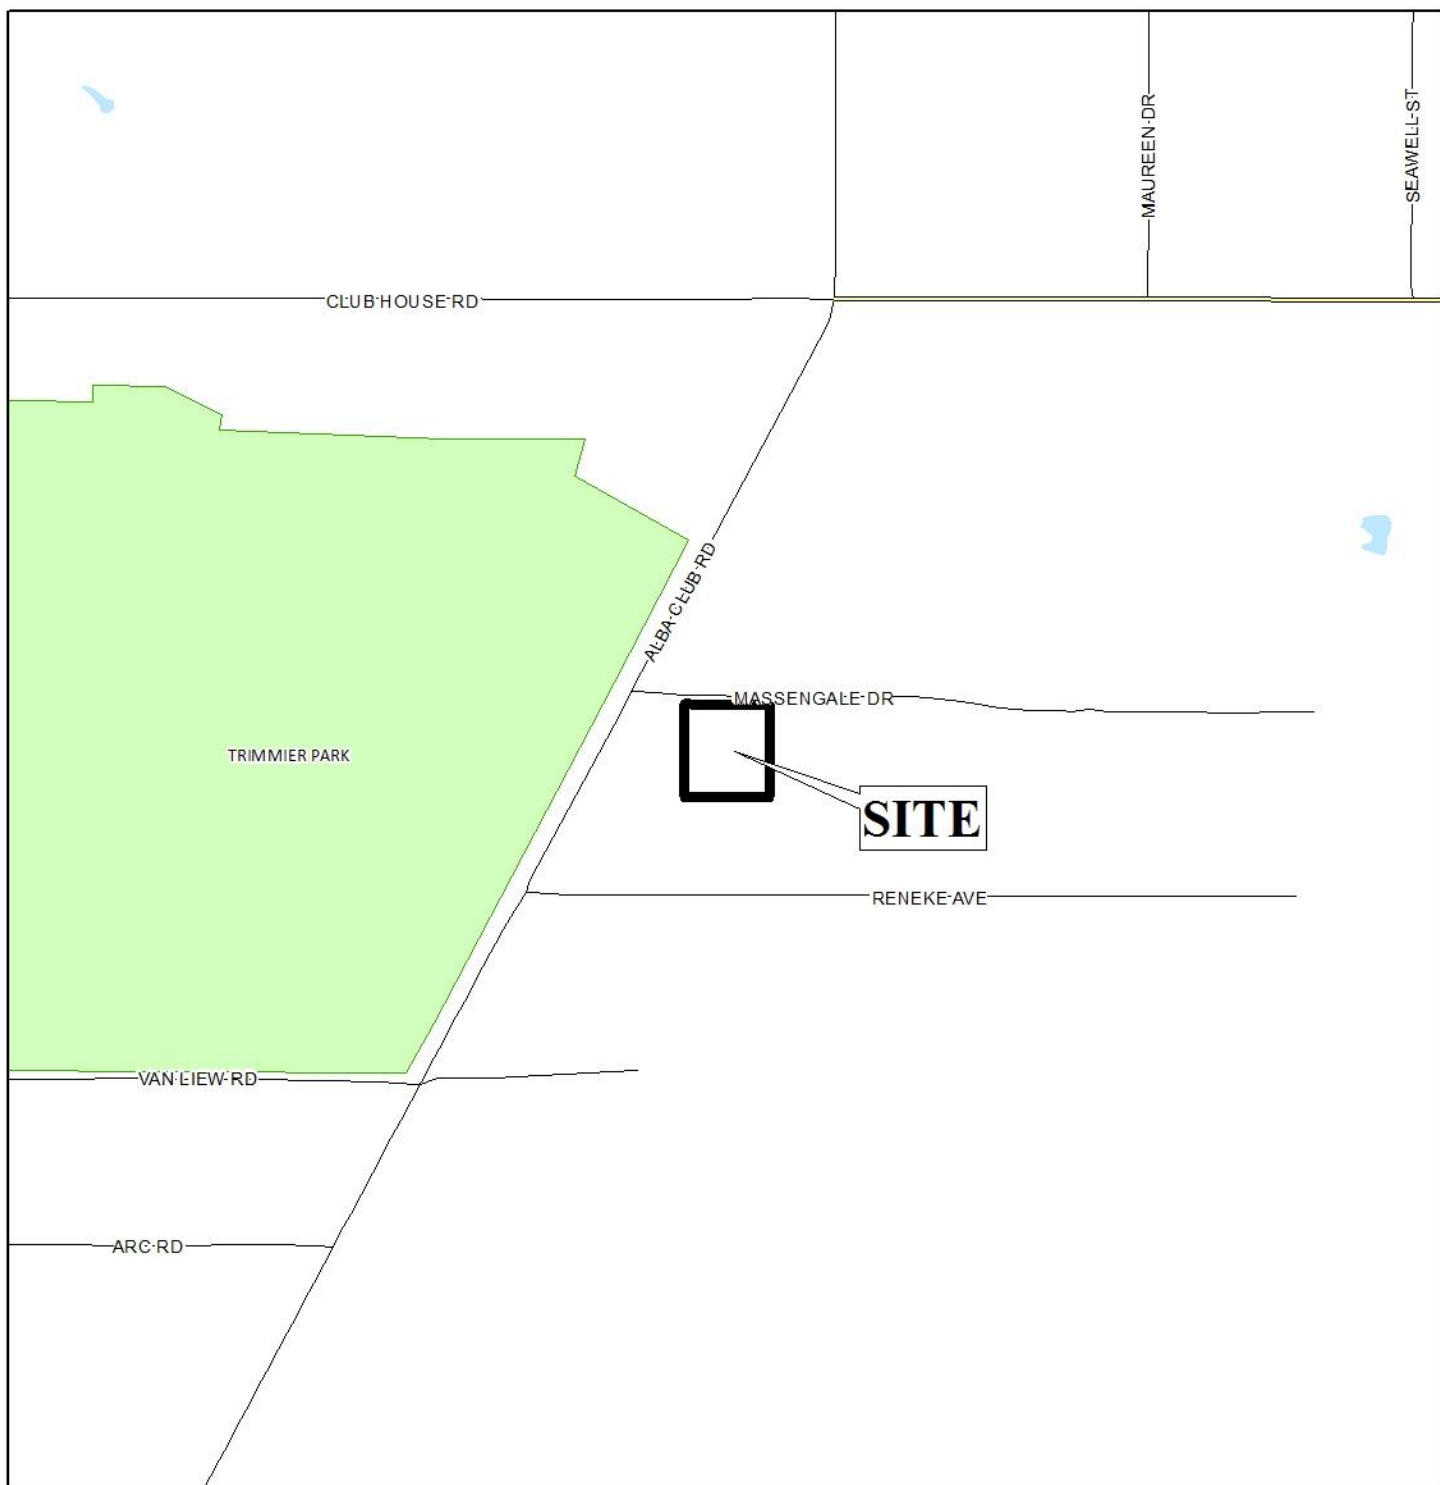

Both sites have adequate frontage along Massengale Drive, a minor closed-end street and which has an adequate 50' wide right-of-way. Per Traffic Engineering comments, driveway number, size, location and design to be approved by Traffic Engineering and conform to AASHTO standards.

As on the preliminary plat, the lot size label should be retained in both square feet and acres on the Final Plat, or a table should be furnished on the Final Plat providing the same information. No easements are indicated on the preliminary plat. Any utility easements should be retained on the Final Plat and a note should be placed on the Final Plat stating that no structure may be placed or constructed within any easement. The plat illustrates a 25' minimum building setback for both lots, which should be retained on the Final Plat.

Based on the preceding, this application is recommended for Tentative Approval, subject to the following conditions:

- 1) retention of the 25' minimum building setback line along Massengale Drive;
- 2) retention of the lot size in both square feet and acres, or the furnishing of a table on the Final Plat providing the same information, adjusted for dedication;
- 3) placement of a note on the Final Plat stating that no structure may be constructed or placed within any easement (if applicable);
- 4) compliance with the Engineering comments: *[FINAL PLAT COMMENTS (should be addressed prior to submitting the FINAL PLAT for review and/or signature by the City Engineer): A. Provide all of the required information on the SUBDIVISION PLAT (i.e. signature blocks, signatures, certification statements, written legal description, required notes, legend, scale, bearings and distances) that is required by the current Alabama State Board of Licensure for Professional Engineers and Land Surveyors.
