

LILA'S PLACE SUBDIVISION

Engineering Comments: **FINAL PLAT COMMENTS** (should be addressed prior to submitting the FINAL PLAT for review and/or signature by the City Engineer):

- A. Provide all of the required information on the SUBDIVISION PLAT (i.e. signature blocks, signatures, certification statements, written legal description, required notes, legend, scale, bearings and distances) that is required by the current Alabama State Board of Licensure for Professional Engineers and Land Surveyors.
- B. Provide the Surveyor's and Owner's (notarized) signatures.
- C. Add a note – "As shown on the 1984 aerial photo (FLIGHT 24 - #73) LOTS 1 and 2 will receive historical credit of existing (1984) impervious area towards stormwater detention requirement per Mobile City Code, Chapter 17, Storm Water Management and Flood Control) as follows: LOT 1 – 1,700 sf and LOT 2 – NONE.
- D. Email a pdf copy of the FINAL SUBDIVISION PLAT and LETTER OF DECISION to the Permitting Engineering Dept. for review at land.disturbance@cityofmobile.org prior to obtaining any signatures. No signatures are required on the drawing.
- E. After addressing all of the FINAL SUBDIVISION PLAT review comments provide the ORIGINAL (with all signatures except for the Planning Commission, Traffic Engineering, and City Engineer), one (1) copy, and a transmittal letter to the Engineering Permitting Department. They can be dropped off at 205 Government St. or mailed to PO Box 1827, Mobile, AL, 36633.

Traffic Engineering Comments: Driveway number, size, location, and design to be approved by Traffic Engineering and conform to AASHTO standards.

Urban Forestry Comments: Property to be developed in compliance with state and local laws that pertain to tree preservation and protection on both city and private properties [Act 929 of the 1961 Regular Session of the Alabama Legislature (Acts 1961, p. 1487), as amended, and City Code Chapters 57 and 65]. Private removal of trees in the right-of-way will require approval of the Mobile Tree Commission. Removal of heritage trees from undeveloped residential sites, developed residential sites in historic districts, and all commercial sites will require a tree removal permit.

Fire-Rescue Department Comments: All projects within the City Limits of Mobile shall comply with the requirements of the City of Mobile Fire Code Ordinance (2012 International Fire Code). Fire apparatus access is required to be within 150' of all commercial and residential buildings. A fire hydrant is required to be within 400' of non-sprinkled commercial buildings and 600' of sprinkled commercial buildings.

The preliminary plat illustrates the proposed 2-lot, 0.4± acre subdivision which is located at the Southeast corner of Gulfwood Drive and Gulfwood Drive East, within Council District 7. The applicant states that the subdivision is served by city water and sanitary sewer systems. The purpose of this application is to create two (2) legal lot of record from one (1) existing legal lot of record.

The site has been given a Low Density Residential (LDR) land use designation, per the Future Land Use Plan and Map adopted May 18, 2017 by the Planning Commission. The Future Land

Use Plan and Map complements and provides additional detail to the Development Framework Maps in the Map for Mobile, adopted by the Planning Commission at its November 5, 2015 meeting.

This designation applies to existing residential neighborhoods found mostly west of the Beltline or immediately adjacent to the east side of the Beltline.

The primary land use in the LDR districts is residential and the predominant housing type is the single-family housing unit, detached or semi-detached, typically placed within a street grid or a network of meandering suburban streets. The density in these districts ranges between 0 and 6 dwelling units per acre (du/ac).

These neighborhoods may also contain small-scale, low-rise multi-unit structures at appropriate locations, as well as complementary retail, parks and civic institutions such as schools, community centers, neighborhood playgrounds, and churches or other religious uses if those uses are designed and sited in a manner compatible with and connected to the surrounding context. The presence of individual ancillary uses should contribute to the fabric of a complete neighborhood, developed at a walkable, bikeable human scale.

It should be noted that the Future Land Use Plan and Map components of the Map for Mobile Plan are meant to serve as a general guide, not a detailed lot and district plan. In many cases the designation of the new Future Land Use Map may match the existing use of land, but in others the designated land use may differ from what is on the ground today. As such, the Future Land Use Plan and Map allows the Planning Commission and the City Council to consider individual cases based on additional information such as the classification request, the surrounding development, the timing of the request, and the appropriateness and compatibility of the proposed use and, where applicable, the zoning classification.

The existing lot was approved by the Planning Commission at its December 31, 1952 meeting, as part of the Gulfwood Subdivision, Unit Four.

The site has frontage on Gulfwood Drive and Gulfwood Drive East, both minor streets without curb and gutter and 50-foot rights-of-way. Typically, streets without curb and gutter require a 60-foot right-of-way, but as this site was originally approved by the Planning Commission and recorded with 50-foot rights-of-way, a waiver of Section V.B.14. of the Subdivision Regulations may be appropriate. The site has compliant 25-foot radius curve at the intersection; therefore, no dedication would be required. As on the preliminary plat, the right-of-way widths of both streets should be retained on the Final Plat, if approved.

As on the preliminary plat, the 25-foot minimum building setback line should be retained on the Final Plat. The proposed lot meets the minimum size requirements of the Subdivision Regulations. As on the preliminary plat, the lot size label in both square feet and acres should be retained on the Final Plat, or a table should be furnished on the Final Plat providing the same information.

The preliminary plat shows an existing house and shed on the property, with the house straddling the proposed lot line. The house is labeled as “to be removed”. It should be noted that prior to

the signing of the Final Plat, demolition permits should be obtained for the removal of both the house and shed, if approved.

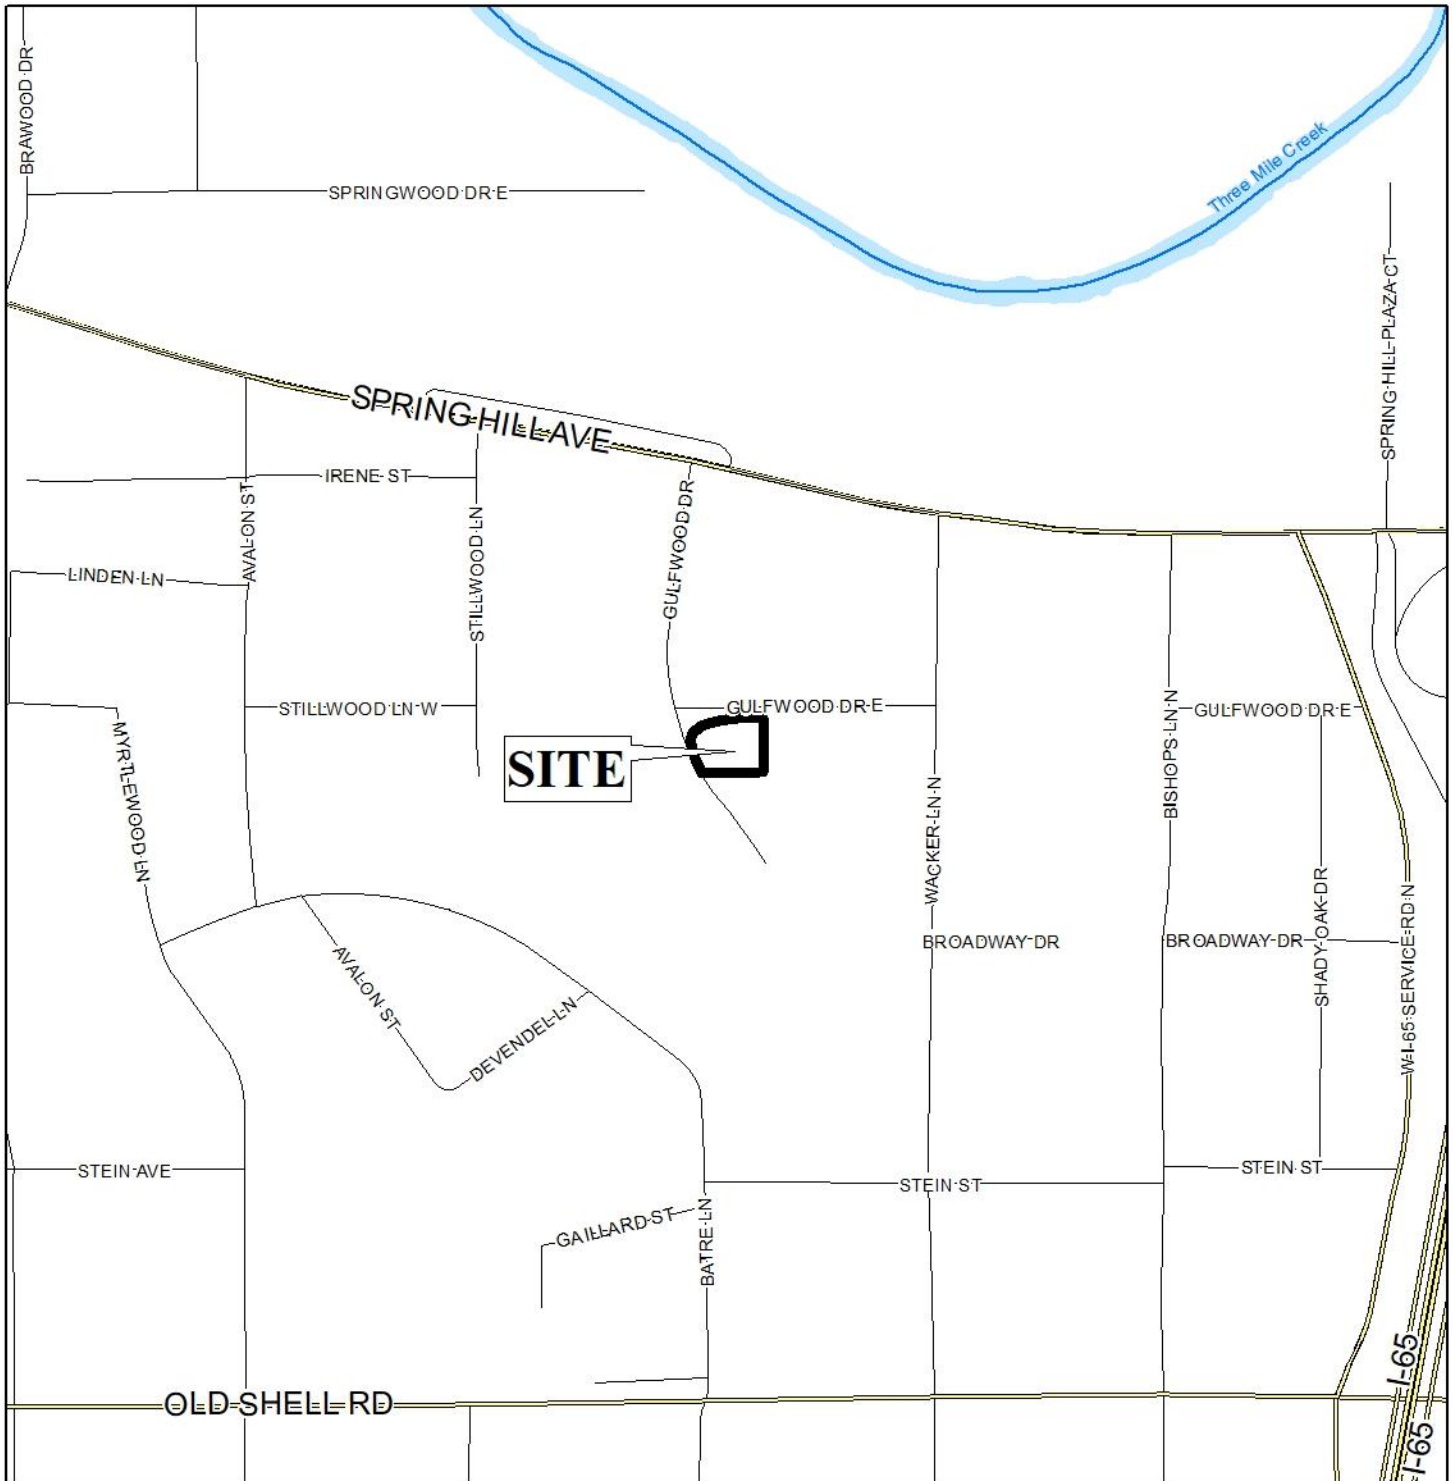

In regards to access management, if approved, a note should be placed on the Final Plat stating Traffic Engineering comments.

The plat meets the minimum requirements of the Subdivision Regulations, with a waiver of Section V.B.14. of the Subdivision Regulations and is recommended for Tentative Approval subject to the following conditions:

- 1) retention of the right-of-way widths of both streets on the Final Plat;
- 2) retention of the 25' minimum building setback line along both street frontages on the Final Plat;
- 3) retention of the lot size label in both square feet and acres on the Final Plat, or the furnishing of a table on the Final Plat providing the same information;
- 4) obtaining demolition permits for both the existing house and shed prior to the signing of the Final Plat;
- 5) compliance with the Engineering comments: (*FINAL PLAT COMMENTS (should be addressed prior to submitting the FINAL PLAT for review and/or signature by the City Engineer): A. Provide all of the required information on the SUBDIVISION PLAT (i.e. signature blocks, signatures, certification statements, written legal description, required notes, legend, scale, bearings and distances) that is required by the current Alabama State Board of Licensure for Professional Engineers and Land Surveyors. B. Provide the Surveyor's and Owner's (notarized) signatures. C. Add a note – "As shown on the 1984 aerial photo (FLIGHT 24 - #73) LOTS 1 and 2 will receive historical credit of existing (1984) impervious area towards stormwater detention requirement per Mobile City Code, Chapter 17, Storm Water Management and Flood Control) as follows: LOT 1 – 1,700 sf and LOT 2 – NONE. D. Email a pdf copy of the FINAL SUBDIVISION PLAT and LETTER OF DECISION to the Permitting Engineering Dept. for review at land.disturbance@cityofmobile.org prior to obtaining any signatures. No signatures are required on the drawing. E. After addressing all of the FINAL SUBDIVISION PLAT review comments provide the ORIGINAL (with all signatures except for the Planning Commission, Traffic Engineering, and City Engineer), one (1) copy, and a transmittal letter to the Engineering Permitting Department. They can be dropped off at 205 Government St. or mailed to PO Box 1827, Mobile, AL, 36633.*);
- 6) placement of a note on the Final Plat stating the Traffic Engineering comments: (*Driveway number, size, location, and design to be approved by Traffic Engineering and conform to AASHTO standards.*);
- 7) compliance with the Urban Forestry comments: (*Property to be developed in compliance with state and local laws that pertain to tree preservation and protection on both city and private properties [Act 929 of the 1961 Regular Session of the Alabama Legislature (Acts 1961, p. 1487), as amended, and City Code Chapters 57 and 65]. Private removal of trees in the right-of-way will require approval of the Mobile Tree Commission. Removal of heritage trees from undeveloped residential sites, developed residential sites in historic districts, and all commercial sites will require a tree removal permit.*); and
- 8) compliance with the Fire-Rescue Department comments: (*All projects within the City Limits of Mobile shall comply with the requirements of the City of Mobile Fire Code*

Ordinance (2012 International Fire Code). Fire apparatus access is required to be within 150' of all commercial and residential buildings. A fire hydrant is required to be within 400' of non-sprinkled commercial buildings and 600' of sprinkled commercial buildings.).
