

## **NORMA WALDRESS SUBDIVISION, RESUB OF LOT 1**

Engineering Comments: Must comply with the Mobile County Flood Damage Prevention Ordinance. Development shall be designed to comply with the storm water detention and drainage facility requirements of the City of Mobile storm water and flood control ordinances, and requiring submission of certification from a licensed engineer certifying that the design complies with the storm water detention and drainage facility requirements of the City of Mobile storm water and flood control ordinances prior to the issuance of any permits.

Fire-Rescue Department Comments: All projects within the City Limits of Mobile shall comply with the requirements of the City of Mobile Fire Code Ordinance (2012 International Fire Code). Projects outside the City Limits of Mobile, yet within the Planning Commission Jurisdiction fall under the State or County Fire Code (2012 IFC).

MAWSS Comments: No comments.

The preliminary plat illustrates the proposed 3-lot, 26.5± acre subdivision which is located on the South side of Tanner Williams Road, 165'± East of Novatan Road. The site is within the Planning Jurisdiction and the applicant states that the subdivision is served by city water and sewer. The purpose of this application is to create three legal lots of record from one legal lot of record.

There is an existing single-family residence located on the subject property. The single-family residence will continue to reside on the proposed Lot A.

The proposed lots front Tanner Williams Road, a major street on the Major Street Plan and Novatan Road North, a minor street without curb and gutter. As a major street, Tanner Williams Road requires a 100' wide right-of-way width. The existing right-of-way width for Tanner Williams Road is depicted as 80' on the preliminary plat and therefore dedication to provide 50' from the centerline should be required, if approved. Novatan Road North is depicted as having an 80' right-of-way width on the preliminary plat. As a paved street without curb and gutter, a minimum 60' right-of-way width is required, therefore no dedication is required.

In accordance with Section V.D.2. of the Subdivision Regulations, the proposed lots exceed the 7,200 square foot minimum lot size requirement for lots served by public water and sanitary sewer systems. The lot size information is depicted in both square feet and in acres on the preliminary plat and should be retained on the Final Plat, if approved.

As a means of access management, a note should be placed on the Final Plat, if approved, stating that each lot is limited to one curb cut, with the size, design and location of the curb-cut to be approved by Mobile County Engineering and conform to AASHTO standards.

This site is located in the County; therefore, any lots which are developed commercially and adjoin residentially-developed property must provide a buffer, in compliance with Section V.A.8. of the Subdivision Regulations. A note should be placed on the Final Plat, if approved.

Based upon the preceding, this application is recommended for Tentative Approval subject to the following conditions:

- 1) Dedication to provide 50' from the centerline of Tanner Williams;
- 2) Retention of the lot size information in both square and in acres on the Final Plat;
- 3) Retention of 80' right-of-way width along Novatan Road North;
- 4) Placement of a note on the Final Plat stating that the lots are each limited to one curb cut along Novatan and Tanner Williams Road, with the size, design and location of the curb-cut to be approved by Mobile County Engineering and conform to AASHTO standards;
- 5) Placement of a note on the Final Plat stating that any lots which are developed commercially and adjoin residentially developed property must provide a buffer, in compliance with Section V.A.8. of the Subdivision Regulations;
- 6) Compliance with Engineering Comments and placement as a note on the Final Plat: *(Must comply with the Mobile County Flood Damage Prevention Ordinance. Development shall be designed to comply with the storm water detention and drainage facility requirements of the City of Mobile storm water and flood control ordinances, and requiring submission of certification from a licensed engineer certifying that the design complies with the storm water detention and drainage facility requirements of the City of Mobile storm water and flood control ordinances prior to the issuance of any permits.); and*
- 7) Compliance with Fire Comment: *(All projects within the City Limits of Mobile shall comply with the requirements of the City of Mobile Fire Code Ordinance (2012 International Fire Code). Projects outside the City Limits of Mobile, yet within the Planning Commission Jurisdiction fall under the State or County Fire Code (2012 IFC).*
